Nina Kuei, MD

University Hospitals

Educational Objectives

At the conclusion of this activity, the participant should be better able to:

- 1 Describe common sleep disturbances seen in Autism Spectrum Disorder
- 2 Explain current neurobiological hypotheses associated with sleep disturbances in ASD
- 3 Identify recommended sleep interventions (both behavioral and pharmacological) for ASD
- 4 Describe the developmental goals during adult transition
- 5 Explain why pediatric providers play a key role in assisting families through the adult transition process
- 6 List at least three major transition topics important for providers to address with families during the adult transition process
